Dear Sir

For many years we at Njala University (NUC) have been pleased to have Professor R.P. Holten working with us in a variety of ways. He has taught most of our present lecturers when they were students at our former campus at Tower Hill in Freetown.

When we moved to our present site he helped to setup our computer center. In recent years Prof. Holten has acted as consultant and resource person for reorganizing of our Mathematics Department and with curriculum development.

We here at NUC want to also commend him for his community development work with The One Family Foundation (TOFF). We hope that he can continue to combine this work with his educational efforts at Njala University.

We hope The One Family Foundation can assist us to obtain lecturers to aid in our expanding curriculum. Besides other academic disciplines we emphasize personal and community development programmes.

We also want to solicit your support in expanding our library and student reference materials.

Yours Sincerely

Francis P. Bongay (Mrs.)  
Registrar
